Subject: Meeting with WTI to discuss 2-Acetylaminofluorene emissions

Talked to a Mr. Vincent Waggoe who is the environmental engineer assigned to do the TRI submittals for WTI/Heritage. I explained why we wanted to talk to him and was going to give him some time to pull information together and to check the validity of the emissions. I set up the meeting for next Tues on the 19th. All your calendars indicated you were free at this time.
